Book Title (centered, about halfway down the page)

By you (or your pen name, if you use one, then triple space)

Start your story here. Use 1 to 1.25 inch margins. Double space. Use a standard 12 point font (Times New Roman is often preferred). Indent paragraphs. Don't double double space between paragraphs—turn off extra spaces after paragraph. Chapter headings for books start down the page like this title page did, but no byline.

On succeeded pages, you'll need your last name, your title or a keyword from the title, and a page number in the header.

Proof carefully. You don't want typos—especially on your first page. More info in SCBWI's *The Book* which you may download at scbwi.org.
